**DETAILED ACTION**  
**REASONS FOR ALLOWANCE**

Claims 28-34 and 37-40 are allowed.

The following is an examiner's statement of reasons for allowance for claims:

Claim 28 is allowed because of the prior art, either singly or in combination, fails to anticipate or render obvious, the method, including steps of forming a semiconductor film in said second opening portion, wherein said semiconductor film is formed by joining a second semiconductor film growing from a surface exposed from said second opening portion of said first semiconductor film and a third semiconductor film growing from the main surface of said semiconductor substrate, wherein said second semiconductor film is a poly crystal and said third semiconductor film is a single crystal. These features in combination with the other elements of the claim are neither disclosed nor suggested by the prior art of record.

Claim 38 is allowed because of the prior art, either singly or in combination, fails to anticipate or render obvious, the method, including steps of forming, in said second opening portion, a second polycrystalline semiconductor film growing from a surface exposed from said second opening portion of said first semiconductor film and forming a link base of said bipolar transistor and a third single crystalline semiconductor film growing from the main surface of said semiconductor substrate and forming a true base region and emitter region of said bipolar transistor, by an epitaxial growth method so

that they are joined to each other. The prior art, either singly or in combination, fails to anticipate or render obvious.

Claims 29-34, 37, and 39-40 depend from claim 28 or 38 so they are allowable for the same reason.
